

Customer Journey Map

Date	02 July 2026
Team ID	xxxxxxx
Project Name	Credit Card Approval Prediction Using Machine Learning
Maximum Marks	2 Marks

Customer Journey Map: Map out the customer's experience stage-by-stage, capturing their

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions	Receives applicant details and credit history.	Enters applicant information into the system and initiates prediction	Reviews the prediction result and completes the approval or rejection process.
Touchpoint	Credit card application form, applicant documents, customer database.	Flask web application, trained ML model, applicant records.	Prediction result page, approval dashboard, customer notification.
Customer Thought	"I need to verify this application accurately."	"I hope the model provides a reliable prediction."	"The prediction helps me make a quick and confident decision."
Customer Feeling	Focused but overwhelmed by many applications.	Confident and optimistic as the system performs the analysis.	Satisfied because the process is faster, more accurate, and consistent.

actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.
